Experience

Salem State University | Salem, MA Network Technician I | 11/2025 - Present

- Managed network support requests through Jira, troubleshooting wired and wireless connectivity issues across campus infrastructure
- Activated network ports and configured VLANs on Aruba switches, including panel-to-switch patching
- Provisioned 70+ wireless access points (APs) and installed 100+ APs to support enterprise wireless deployments
- Performed fiber patching between core campus switches to maintain inter-building connectivity
- Replaced, terminated, and tested Ethernet cabling using cable toners and line testers
- Diagnosed and resolved wired and wireless connectivity issues for laptops, printers, gaming consoles, and IoT devices
- Documented approximately 900 wall ports to support E911 compliance and maintain accurate network infrastructure records.
- Utilized ArubaOS, phpIPAM, Linux command-line tools (SSH, Vim, and grep), and Jira to support daily network operations.

Salem State University | Salem, MA Media Services Technician | 10/2024 - 05/2025

- Performed preventive maintenance and technical inspections of AV systems across campus classrooms, lecture halls, and meeting spaces, diagnosing and resolving hardware and connectivity issues
- Conducted firmware updates on Extron matrix switchers, replaced projector bulbs, and monitored projector usage
- Served as the sole evening technician for the Media Services department, providing on-site technical support and resolving time-sensitive AV issues for faculty and staff
- Configured, deployed, and operated AV systems—including cameras, microphones, speakers, projectors, and Zoom—for university meetings, webinars, and live-streamed events
- Documented equipment issues, maintenance activities, and service requests to support efficient troubleshooting and asset management.
- Assisted with installation, setup, and teardown of AV equipment for campus presentations, ceremonies, and special events.

Skills

TCP/IP, VLANs, DHCP, IP Addressing & Subnetting, Network Troubleshooting, Linux CLI, SSH, Jira, Proxmox, Aruba OS/OS-CX

Technical Projects

Home Lab Environment

- Built and maintained a virtualized home lab environment using Proxmox to host network and server services
- Deployed and managed OPNsense for routing, firewall testing, and network administration practice
- Configured TrueNAS for network-attached storage (NAS) and local file storage
- Hosted Pi-hole for network-wide DNS-based ad blocking and Jellyfin for local media streaming
- Gained hands-on experience with virtualization, network administration, DNS services, storage management, and system administration

Education

Salem State University | Salem, MA B.S. Information Technology | Minor: Cybersecurity | 06/2028

- Incoming President of the Cybersecurity Club (Fall 2026)
- Relevant Coursework: Networking, Information Security
